

We – Allianz Deutschland AG – as one of our groups' flagship have set up an advanced and high-end Analytics Center in Wroclaw in summer 2019. Our main task is to serve as decision-making support for our top management and the relevant specialist areas and to meet the regulatory requirements under Solvency II.

You are studying mathematics or a math-related subject? You are looking for a successful start to your career with ambitious and challenging tasks within an international environment? Then we are looking for you!

Quantitative Analyst

in the **corporate actuary** department of our **Allianz Deutschland** Office in **Wroclaw**

Your Tasks:

- Participation in maintaining and further develop the internal deterministic and stochastic corporate model for the calculation of solvency-, new business- and annual financial statement ratios
- Support determining the medium- and long-term development (local GAAP and IFRS) of important balance sheet and performance figures
- Examination the future financial viability of profit participation,
- Participation in answering fundamental strategic questions (e.g. IFRS 17),
- Actuarial and statistical investigations

Our Requirements:

- Master's or PhD degree in mathematics, physics or related with proven track record
- Experience of working in financial institution would be a plus (ideally in actuarial or related)
- Very good analytical and conceptual skills to analyze complex technical issues independently and promptly and to prepare them for specific target groups.
- Very good English, German would be a plus
- Will to continuously extend your work knowledge, for example actuarial training or basic programming (Java, Python)

We offer:

- Unique opportunity for professional development providing advanced and complex analysis using high-end tools and software

- Opportunity for international career and business travels
- Competitive salary together with yearly bonus
- Great working atmosphere based on constant development and mutual support
